

Bobcat

All the Tools you need for Real (or Imaginary!) Modal Analysis

Bobcat:

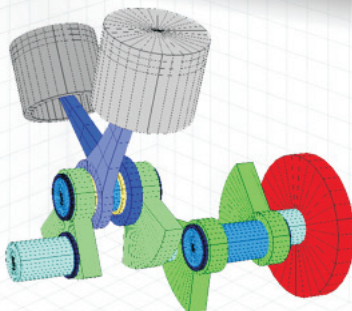

- ▶ Portable convenience – Less than 2 lbs.
- ▶ 4 Inputs with ICP® – Use your hammer with a Triax accel
- ▶ Clean, accurate measurements with real-time FRF's
- ▶ Flexible displays with auto and manual scaling
- ▶ Store data for direct entry in your Modal Analysis program

We took no shortcuts designing BOBCAT, so you can take all the shortcuts you need to get your job done quickly and easily.

STAR 6:

- ▶ Simplified Model creation
- ▶ Wide selection of powerful curve-fitters
- ▶ The finest graphical displays available in any Modal package
- ▶ Detailed user help available from Spectral Dynamics: on-line, on the phone or in the manual
- ▶ Simple integration with FEMtools for model verification

Crankshaft model with over 30 elements - created in **STAR 6**

Spectral Dynamics . . . We do things right!
